# Smart Smart Policy

Government of South Australia  
Department for Education

## DOCUMENT CONTROL

**Managed by:**  
Principal

**Approved by: Governing Council**

B-7 Leadership Team

**Date approved: August 2018**

**Review Date: August, 2018**

**Next review: August, 2021**

### Rationale

Lake Windemere B-7 School is a Sun Smart school. We acknowledge that too much UV radiation can cause sunburn, skin damage, eye damage and skin cancer. Australia has one of the highest rates of skin cancer in the world. Overexposure to UV during childhood and adolescence is a major cause of skin cancer. We also acknowledge that too little sun can lead to low vitamin D levels that are needed to regulate calcium levels in the blood. Vitamin D is necessary for the development of healthy teeth, bones and muscles. We need to ensure a healthy balance between UV exposure and UV protection. We acknowledge that skin should be protected when the UV level is 3 and above, that is from the beginning of August to the end of April and at any time that the UV reaches 3 and above. During term 2 sun protection is not needed when the UV level is below 3 to support vitamin D maintenance.

### Purpose

To increase the school's community awareness of skin cancer and the importance of skin protection.  
To increase the school's community awareness of the importance of a healthy balance between UV exposure and UV protection.  
To encourage the use of a combination of protection strategies which will lower the risk of skin damage and skin cancer  
Encourage children's personal responsibility for and decision making about skin protection.  
Increase awareness of the need for environmental changes in our school to reduce the level of exposure to the sun.

### Action Skin protection is everyone's business!

- The Skin Protection Policy is in place during terms 1, 3 and 4 when the ultra violet radiation level is likely to be 3 and above.
- If there is an all-day activity in May the UV is monitored and sun protection implemented when the UV is 3 or above.
- All students and staff use a combination of sun protection strategies including the wearing of a broad rimmed/bucket hat that gives good cover to the face, neck and ears whenever they are outside during these times. Any students who do not have a suitable hat must remain in a shaded area to play.
- All students wear sun protective clothing which is the Lake Windemere school uniform- t-shirt with a collar, elbow length sleeves and a high neckline, shorts are the longer style. Rash vests/t-shirts are worn at swimming.
- Staff and parents to role model for students by wearing sun protective clothing, hats and sunscreen and using shade areas as poor as possible when outdoors.
- All outdoor activities including Sports Days and carnivals are planned for early morning, later in the afternoon or at an indoor venue when the UV is level 3 and above.
- All students are encouraged to play in shaded areas as much as possible during Terms 1, 3 and 4 - we have existing shade cloth sails and many shaded play areas.
- All students having access to SPF 30+ sunscreen or higher, broad spectrum, water resistant+ and being encouraged to apply it 20 mins before going outdoors and re-applying every 2 hours when outdoors when the UV is 3 and above.
